

# Introducing the all-new Tower Core from AMF300®

In today's game the core and coverstock must match for peak performance. The Research and Development Team at AMF300 has developed a new core for our latest High Performance series.

The ALL-NEW "Tower Core™" will give you the power of an asymmetric core with the control of a symmetrically designed weight block.

The Radar™ wraps AMF300's proven Mach1™ reactive coverstock around the new "Tower Core™" in a pearlized shell.

What does that mean for you? The ability to not only find the pocket but destroy it once you get there!
