# SERIOUS BREAK

## AMP It Up!

AMF™ introduces the new Triumph AMP™ ... the second ball in this high performance series. The Triumph AMP (Angular Motion Potential) will give you the cleanness through the heads that we all strive for with an incredible angular motion to the pocket. We've increased the differential to an enormous 0.055 which will give you an amazing amount of hook potential. Also, our new One-7plus™ particle coverstock gets you the length you need to create the dramatic angle to carry the corner pins.
