

**New Stronger Cover!**  
**Same Great Core**

**VP2**

AMF300™ has beefed up our mid-performance line with our new VP2™, featuring SPT™ (Super Particle Technology). The proven light bulb core with a Titanium Nugget provides the VP2 with a heavy midlane roll with a very controllable break point, while the SPT coverstock effectively combats the slicker lane surfaces and oils used in today's bowling centers. To complement the AMF300 Titan™, we've given the VP2 a more vibrant color, making the Titan and VP2 the best pair in bowling. For more information contact us at [www.amf300.com](http://www.amf300.com).
