

# The AMFORCE SYSTEM

*Like winning road racers, the balls in the AMFORCE system are designed and equipped differently - inside and out - for maximum performance on different surfaces and surface conditions. It's the right core (chassis) with the right coverstock (tire) that make a powerful competitive difference.*

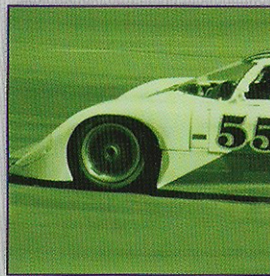

**DRAGSTER**

- Maximum control for a more direct line to the pocket.

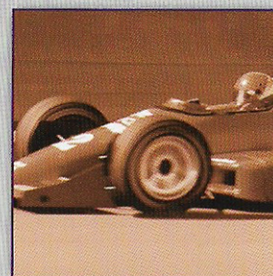

**GT/RALLY**

- Consistent, heavy roll and highest rev-rate for extreme wet-dry conditions.

**SPORTS PROTOTYPE**

- Maximum length, hook, and increased entry angles for late-breaking, hard charging reaction.

**INDY/FORMULARA**

- The largest hook and continuous backend reaction on the slickest lane conditions.
