

The Strike Force.

It doesn't matter whether the lane you're bowling on is hooking or holding. There's nothing like an Angle for putting striking power in the pocket. Because the Angle is more consistent on a wider variety of lane surfaces than any other ball.

And each week, as more and more pros and top bowlers are bowled over by the Angle's performance, more and more of them are switching to it.

Put the strike force in your pocket. Frame after frame. Game after game.

Get a grip on the Angle.

The best approach
