

Most Valuable Player.

You can't call just any ball the season's best.

It's got to be the one that was used by more winners, more TV finalists, and more tournament match play finalists than any other ball on the 1982 Pro Bowlers Winter tour.

It's got to be the ball that helped take top money in the Firestone Tournament of Champions.

It's got to be the Angle.

The world's first urethane bowling ball. And the first choice of champions. Because it's more consistent on a wider variety of lane surfaces than any other ball.

Let AMF's advanced technology put this kind of striking power in your pocket. The Angle. It pays to play with the winner.

AMF

The best approach.
