

NEW GRAY URETHANE. THE HARD ANGLE.

Now
when lanes get dry
you'll still have the
winning angle.

Here's a new urethane Angle that's perfect for dry lanes... a new Hard Angle with *control plus power!* That's the big news. Now, for the first time, you can get the greater control needed on drier lanes and still have the tremendous hitting power of urethane.

The new Hard Angle — the gray one — you'll

call it the "gray ghost" because now, even on dry lanes, the pins don't stand a ghost of a chance! Team it up with the sensational soft black Angle — today's winningest ball. Now you've got the game's heavy hitters! Now you can bowl any lane, any condition, any time — and win!

The best approach
