Introducing

the *powerUP* Series from AMF - three balls for three different skill ranges. Developed by the same innovative company that brought you AMFORCE - a ball system for all lane conditions. Whether you are a beginner bowler, a casual league bowler or on the verge of becoming a scratch bowler, these balls are designed to power up your game.

powerUP Impact - a urethane ball priced attractively for beginner bowlers who need a consistent performing, smooth arcing ball. The Impact's three piece core maintains control down the lane while retaining its energy into the pins.

powerUP Reactor - a three piece reactive ball featuring a Flexel™ Reactive Resin cover for the casual league bowler ready for more performance. The reactive resin gives a much sharper backend reaction, larger overall hook, and better pin carry than a urethane or polyester ball.

powerUP Slam - a two piece reactive ball for the serious league bowler.

The Super-Flex™ Reactive Resin shell is one of the most aggressive in the industry giving you more bite, more dig, more hook and more backend...more of everything.

No matter what your needs or skill level, if you are ready to take the next step, we have a *powerUP* ball for you.

See one at your pro shop today.
