

NIGHT
HAWK

MENACE

BE THE HUNTER

INTRODUCING THE NIGHT HAWK MENACE,
FEATURING SPT™ (SUPER PARTICLE TECHNOLOGY).

The original Night Hawk carnage continues (and escalates), thanks to our all-new Super Particle Technology coverstock. SPT grips the lane like a pair of razor-sharp claws. You'll get 3 to 5 more boards of hook than the original Night Hawk, even in heavy oil. And unlike other particle balls, SPT is fully tunable—you can shine or dull the ball as needed to work in a variety of conditions, making this the most versatile particle

ball on the market. At the core of the Menace is our exclusive PowerRing technology. The PowerRing gives you a strong and continuous back end reaction with the forgiveness of a traditional symmetrical core for more area and better pin carry. The Menace is available at the pro shops displayed at www.amf.com. Isn't it time you were the hunter, not the hunted?
