MONSTER HOOK

We took our popular Night Hawk and gave it a heart transplant. But we didn't just give it any heart – we gave it the cold-blooded heart of a killer. Introducing the Night Hawk Torque. It's the same core body as the original Night Hawk Menace, but beating inside the Torque is a devastatingly colossal flip block and a lethally dense Power Ring. And on the outside is our exclusive next generation coverstock SPT II. The result is pure genius. Evil genius.
