

Skids Farther, Corners Harder. The New RPM Swirl.™

Hook your seat belt and strap on your headgear. The RPM Swirl from AMF is taking you on a new route to the winner's circle.

The Swirl has the same core, same high-revving performance, and same phenomenal hitting power as our incredible RPM. With an important difference.

With its aggressive, pearlized formulation of AMF's Reactathane II™

coverstock, the Swirl skids farther down the lane, then snaps hard on the backend for a high-rev charge into the pins. It produces more over-all hook, skid and flip, covering more boards on the backend than even the original RPM.

It may not qualify for NASCAR™ competition, but the new RPM Swirl will really let you burn up the lanes.
