

It's A Smash!

ULTRAC

Weber used it for two 300's on the Senior Stop, Firpo won with it in Texas, and now reviewers are raving about its explosive performance!

From the August issue of *Bowling This Month*:

"The Ultra-C gets through the heads . . . better than the regular coverstock Super Cuda, better than the regular Synergy, and even tops the Danger Zone."

"The Ultra was the only ball that did not want to stop rolling and driving through the pocket on any condition."

"This ball has all of the elements to make it one of the big winners on the tour this fall. . . . It keeps you in control of the breakpoint even after most of the really popular regular coverstock balls have gone back in the bag."

"As they say in Texas, it only gave you three boards to hit, but they all had arrows on them. It virtually opened up the whole side of the lane. . . ."

From the September issue of *Bowlers Journal International*:

"On the oil pair, we could line up and play the ball from the 1st to the 4th arrow pretty easily. . . . For all users, the polished Ultra-C had big revs off the hand, great length, a strong but smooth back end and explosive hit, even for a 14-pound ball."

"This is one awesome RPM and an excellent addition to the AMF line for strong versatile performance at a decent price."
