

# WHICH SUMO™ HAS THE POWER YOU NEED?

You can now choose between the raw unrelenting power of a Urethane Sumo or the kinetic control of a Polyester Sumo.

The original Sumo's patented flywheel weightblock delivers unsurpassed carrying power with a crank, counter-crank energy release system. It's ideal for the new 3 units of oil standard.

But if the oil pattern dries out, just reach for the new Purple Passion Sumo. By combining the patented flywheel weightblock with the 50% larger footprint

*The Purple Passion Sumo.  
The first high performance  
2-piece non-urethane ball.*

of polyester, AMF has developed the first true high performance 2-piece non-urethane ball. It offers greater control without sacrificing any power.

So the choice is yours. 2-piece urethane or 2-piece polyester? They both deliver the awesome hitting power of the Sumo. But they're designed for 2 unique lane characteristics. Clearly you're going to bowl your best with a Sumo. So choose one or both and let them do the rest.
