DRILL MACHINE

ABS Hydraulic Drilling Machine

High Quality Researched, Developed, Manufactured and Constructed in Japan.

Made in Japan

World's First Increased grip capability with Hydraulic clamping! By holding the ball in a fixed position, the instability during drilling through different mass, and for double hole drilling is dramatically improved.

Increased Control Zero control can be adjusted easily with Laser Assist and minor adjustments to a drilling position (i.e. Grip Center).

Machine Characteristics

ABS Hydraulic Clamping System

Keeps the drill area free, with a tight hold

World's first hydraulic clamping system for bowling balls.

Instable ball clamps cause inaccurate drilling.

Unstable ball while drilling can result in a larger hole and a rough drill surface.

Hydraulic Clamping System

A smooth drilling, with a clean drill surface.

Laser Light Assist.

Uses a LM Guide to assist the driller (assistance on x and y co-ordinates)

Cleaning Effect of strong alkaline ion water

Soap Effect

Alkaline ion water contains properties which help dissolve dirt, creating a detergent like effect on stubborn oil and debris.

Absorption and Osmotic Swelling Effects

The Strong alkaline ion water efficiently absorbs and pulls dirt and oil to the surface of the bowling ball.

Separation Effects

The negative ion in the alkaline ion water absorbs the positive ions in the oil and dirt; and separates the debris from the surface of the bowling ball.

Emulsion and Dispersion Effects

The strong alkaline ion water disperses and emulsifies the oil and dirt, for efficient cleaning.

Coaching Tools

Specto is a new tracking system for centers, bowlers, and coaches. It records information about bowlers' shots using a high-power sensor and displays it to them on an easy-to-use app.

Simply order a Specto system and allow your bowlers to use your Specto Lanes. Your bowlers will easily be able to connect to the Specto app to view their stats, perform practice drills on their own, or compete in challenges with friends and bowlers worldwide. This fun tool can help bowlers improve and create a buzz in your center.

Specto Complete System - 157-8602 (115v/60Hz)
 Specto Complete System - 157-8602E (220v/50Hz)

KEGEL is excited to announce updates to the Specto bowling app including the new module Specto worlds: A new experience and environment for every bowler.

Coaching Tools

TORCH

One of the most difficult things for a bowler to do is visualize the ball path from the foul line to the breakpoint. From entry level bowlers to the most advanced, the Torch allows bowlers to see the initial path of the bowling ball like no other product before.

The Torch is a simple light targeting tool used to help with accuracy and alignment. Using LED lights, it reflects a path of light on the lane to help you select the correct launch angle and hit your target time after time. As the player moves left and right, the light will change its position showing you exactly where you should throw the ball.

The Torch was designed to explain the aiming process in a way that can be easily understood by everyone. From children, to beginning bowlers, to special needs bowlers, the Torch is an easy and fun way to quickly improve this important fundamental skill.

Torch Complete System - 157-8800 (115v/60Hz-220v/50Hz)
Optional Battery Upgrade - 157-8801

3D REFERENCE TOOL

The Arrow is a 3D Reference Tool that gives players a physical reference point to see when working on a variety of drills. Visualize your set-up position, pushaway, finish position and more! Compare your technique to something you can see and feel to train yourself quickly. This dynamic tool can take the place of many coaching aids.
