

One, Two, Cha-Cha-Cha.
No more

The New Q.

What We Thought Of **Next.**

With current conditions, the new ball materials actually tip the
conditioner of the line. Introducing Polychem® Signature Edition 28
with its superior lubricity flow-out from under the ball, then flow right
back into place. This results in fewer ball calls, consistent, predictable
ball reaction and less cha-cha-cha—and more satisfied bowlers. Which
means more ball for you. And with our 24-hour technical support,
you'll never be dancing in the dark.
At Polychem we do one thing, manufacture fine line products,
and we've done it well for nearly half a century.

Contact us for information on the New Executive Series of line products.

POLYCHEM

The original
in line to roll line out.
