

# 2.0

It's Quantum.<sup>®</sup> Only More Affordable.  
It's Proactive.<sup>™</sup> Only More Advanced.  
**The New Q. With Proactive 2.0<sup>™</sup>**

**YOU CAN SEE THE DIFFERENCE RIGHT AWAY.** In price. In performance. The finely marbled Proactive 2.0 coverstock absorbs oil 10 times slower than current Proactive and reactive balls (thanks to our exclusive **DryTec** formulation). Which means you stay lined-up longer. A lot longer. Out of the box, it offers the most length of any Proactive ever, but its overall reaction can be adjusted by any pro shop or returned to its original factory finish and reaction using the Brunswick Finishing System featuring 3M<sup>™</sup> Trizact<sup>™</sup> Abrasives — even after it has tracked up. It's Quantum Proactive 2.0. Higher performance. Lower price.

**What will we think of next?**

Buy a new Quantum, get a sleek Quantum gift set **FREE**. A \$60 value.

**The New Q.** Coverstock: Proactive 2.0, Trizact-finished / Traction Characteristic: Delayed Traction Effect (DTX) 2 / Weights: 10-16 lbs. / Hook Potential: 20-12 (dull/shiny) / Length: 5 / Backend: 11 / Average RG: 5.3
