

"Command Zone is the greatest ball I have ever thrown!"

— **Steve Roglen**

"The strong, overwhelming hook on the back is out of this world!"

— **Josh Graham**

"Command Zone doesn't start hooking until it hits the backend. A really fantastic ball."

— **Steve Lew**

"Command Zone will travel in a straight line for 45-50 feet before it makes a distinct, sharp, arc. Is that possible? For this ball, yes. The ball carries everything."

— **Adam Fukushima**

"Command Zone is definitely a skid/snap ball with a massive backend. It's the only ball I know that has a backend rating of 12. Awesome ball!"

— **Matt Shrout**

Introducing the Next Command Zone:[™] Command Zone ARC.[™]

Now We Can Hear From the Rest of You.

They demanded extreme length and a crushing backend. They got it. Now there's Command Zone ARC, for those who want mid-lane strength while maintaining reactive backend power. The same phenomenal coverstock as Command Zone coupled with a lower RG core for improved mid-lane recovery and better utility on heavier oil. Now, everybody will be talking.

Command Zone ARC. Coverstock: M-Control Powerstock • Length: 3.5 • Backend: 11 • RG Max: 2.580 • RG Min: 2.510 • RG Diff: 0.050
