

Q U A N T U M

SOME SAY IT'S DANGEROUS TO MANIPULATE THE LAWS OF PHYSICS. TO OUR CRITICS, WE SAY: **EVOLVE OR DIE.**

TO CREATE THE EVOLUTIONARY QUANTUM, WE USED THE BEST BRAINS IN THE BUSINESS, COMPUTER-AIDED DESIGN (CAD) TECHNOLOGY, THE HOTTEST RESINS. WE TESTED THOUSANDS OF CORE CONFIGURATIONS, COVER STOCK FORMULATIONS. AND WE CHANGED THE STRUCTURE OF THE GAME. FOREVER.

Quantum features three revolutionary urethane balls, each with a different, computer-designed core configuration for unparalleled performance. And a new, unique dynamic characteristic: Quantum's lightweight balls react the same as the heavier, sixteen-pound Quantum balls. Quantum also offers the widest range of center-heavy to cover-heavy weight characteristics, for every lane condition. While its next-generation reactive cover stock resists tracking and cracking for unprecedented durability.
