Blow them away.

The new Fuze™ Detonator™ sets off a deadly combination of explosive hooking action and unparalleled forgiveness by fusing Brunswick's Proactive/Particle technology with their newest Aggressive Reactive coverstock base. This high-load Proactive coverstock provides excellent traction in oiled areas of the lane while still generating strong, smooth reactions from drier outside boards to minimize over/under reactions on varying lane conditions. The Geometrically-Balanced Core Concept also enhances mid-lane recovery and breakpoint control for every type of bowler competing on medium to heavily oiled lane conditions.
