

TAKE IT FROM THE PROS:

"This is the ball that's been winning tournaments from the East Coast to the West. The LT-48". The right ball for today's lane conditions, the right ball for high scoring. Just ask any serious or pro bowler. The LT-48 is the ball they ask for by name, the one that's selling in pro shops all over the country, the one they don't mind paying a little more for. If you want the ball that moves right from the pro shop to your lanes, it's the LT-48."
