

MONSTER
FRENZY

Wild Ones.

Chris Barnes and the new Monster™ Frenzy™

Chris Barnes has found his match – the new Monster Frenzy from Brunswick. The Frenzy's low-RG core combined with N'Control PowerStock™ skid/snap Reactive coverstock produces one wild reaction that clears the front and explodes on the backend. But best of all, this wild formula provides the versatility you would expect in a much higher priced ball. With the Frenzy, you'll discover better mid-lane recovery and smoother control – with the length and backend you're looking for.

Are you ready to unleash the Frenzy?
