

# HELIX

Dynamics

**A TOTAL ECLIPSE OF THE COMPETITION.**

Dual surfaces. Dual purposes. Helix rolls on the power stripe of conventional urethane (keeping it straighter through the heads and resists tracking), then flares out to the other surface of reactive urethane for a more powerful backend reaction.

Weights: 12-16 lbs.  
Hook Potential: 17/9 (dull/shiny)  
Length: 7  
Center/Cover Heavy: 2.7  
Track Flare Potential: 20

raven  
Blackbird,  
fly.

**THE DENSEST MATERIAL IN A BOWLING BALL. EVERMORE.**

Raven Quantum. The most powerful Quantum yet, with all-new reactive urethane cover stock and enhanced mushroom core with a dense, bismuth graphite compound. Smoothest reaction through the front. Strongest backend reaction of any ball.

Weights: 12-16 lbs.  
Hook Potential: 19/11 (dull/shiny)  
Length: 3  
Center/Cover Heavy: 3.5  
Track Flare Potential: 9
