

THIS MUSTANG HAS HORSEPOWER.

A dual-dynamic core features a high density insert at the top, with a bottom balance block for maximum revolutions and optimum angle of entry.

The new Mustang from Champions has the horsepower to deliver the finishing kick necessary for today's lane conditions. Its dual-dynamic core features a high density insert at the top, with a bottom balance block to create maximum revolutions and optimum angle of entry. The Mustang's ultra-reactive coverstock is formulated for aggressive roll and hook without over-reaction in the dry.

The Mustang has a track flare potential of up to four inches and accepts all two-

piece drilling patterns, including exotic leverage, axis and conventional. It comes standard with a factory 600 grit matte finish that will grip the oiliest of lanes and will accept polishing for dryer conditions. It's available in 14, 15 and 16 pounds. The Mustang is the latest in a line of thoroughbred performers from Champions.
