

# A SIMPLY SHOCKING LANE CHOMPING TEETH RATTLING PIN CRUSHING BALL OF DESTRUCTION.

**(Now Available in Ruby Red.)**

After Shock™ features a revolutionary new technology that dramatically simplifies drilling. Its marquee shaped, double cone assembly, contains two flare delaying caps and houses a quadruple density specialty core with our proprietary, undrillable Ceramicore®—the densest pure ceramic component ever used in bowling manufacturing. These powerful core elements are housed in our brand new Super-Flex Resin™ reactive coverstock by BASF. This advanced core/coverstock combination redefines flare potential with a later flare point while still yielding a higher Coefficient of Restitution. The Ruby Red After Shock™ and the Indigo Blue After Shock™ are going to rock your world.

Columbia bowls the world over.®
