AR 300 HYBRID POLISHED

Awesome Reaction 300 Hybrid Polished is the perfect cover for length and a nice big move on the backend. The Crazy Antics provides a crazy amount of length and backend motion for a polished high performance ball!

HI-DYNAMIX CORE

The Hi-Dynamix core is one of the most dynamic cores we've ever produced. With a medium RG, High Differential and High Mass bias, the Crazy Antics' core helps the ball produce awesome mid lane and backend motion. For a core this dynamic you'll love how well it handles the transitions too!

WHAT TO EXPECT

One of the most colorful and eye-catching balls on the market also has a crazy amount of performance built in and will work great on most medium volume conditions. The Crazy Antics is exactly what you're looking for when your sanded ball just isn't getting it done.
