

CUDA

Fear the Deep Blue/C.

CUDA/C

2000

Just when the competition thought it was safe to get back on the lanes, the /C monster returns. CUDA™/C 2000 is a menacing combination of our original, best-selling CUDA™/C core and a new pearlescent Holo-Flex™ reactive shell. Together it goes further and then grips the lane more than any CUDA before it. Even as the track dries up, the ball controls its release of energy up front. It gets through the heads easily to deliver more hook and power through the pins on the backend. The CUDA™/C 2000 with its controllable, arcing motion leaves the pocket no place to hide, and the competition a lot more to fear.

COLUMBIA 300

Columbia bowls the world over.
