

TAKE ONE OUT FOR A SPIN

Step on the accelerator and take it out for thrills! Drive™ is the latest and the greatest from Columbia 300®. This pearl of a ball pairs an asymmetric core with Columbia 300's proven winner: Accelerator™ coverstock. This formulation of resin was created to produce a higher friction in oil, resulting in a stronger move on the lane. The addition of pearl puts more pop in the backend, giving you the maximum amount of Drive through the pins. This fierce competitor rips off the breakpoint, leaving no pins in its wake. For medium-to-dry conditions, your best choice is Drive. Rev it up and speed on to victory!
