

**Darren Franks captures 1st Regional Title with EPX T1**  
 Darren Franks of Canton, GA has been working tremendously hard on his game recently and the hard work paid off this weekend as Darren captured his first regional title. Darren defeated Doug Becker of Clermont, FL, 202-201 using the EPX T1 at Shamrock Lanes in Spartanburg, SC. The victory was worth \$2,500. Darren stated the "EPX T1 really helped during qualifying on Saturday and the two tough finishing matches on Sunday".

**EPX T1 Testimonial from the United Kingdom**  
 I have used the EPX T1 on a variety of conditions since I drilled it, and I have been able to use it on all but the driest of these patterns. I drilled it with a strong pin placement as suggested on the drill sheet. The first time I used it was on a 42 ft. pattern, all I could say was WOW. This ball was hooking a lot more than any of the other balls being bowled. I have since used it on a variety of patterns and the thing that is most noticeable about it is how smooth it is. Also unlike most other strong balls, you can still use this ball on most oil patterns. I have found that this ball offers me a reaction unlike any of the other balls I have thrown, it is very controllable no matter how messy the lane conditions have become...The epoxy coverstock looks like the way forward!

**EPX T1 Florida Testimonial**  
 EPX T1 - this ball is ridiculous in how it lets me play the part of the lane I WANT to play instead of the one everyone else HAS to play. Drilled it before league and last night between it and the Power Drive (also a great ball I love light load particle), I threw quite possibly the easiest 750 I've ever shot, especially when people around me are leaving washouts left and right all night I can sense some good things in my future with this ball, no doubt. I had people coming up to me all night wondering how I was able to cross 17 at the arrows when they're all playing outside 10. :)
