FREEZE SOLID

- NE2 Solid provides a wider foot print on the lane than previous Freeze coverstocks for more overall reaction. The Modified Messenger core core is one of the most successful cores in Columbia 300's great history.

- The Freeze Solid is finished with 800, 1000, 2000 Abralon and then Factory Polished for a great reaction on medium to dry lanes.

- The Freeze Solid takes the popular Freeze line to new levels of performance for any bowler.

- Recommended Cleaner: Powerhouse™ Energizer Cleaner
