

Release the Power and go *Full Throttle!*

If you haven't experienced the Cam Shaft™ core, join the masses and take your game Full Throttle™. At the starting line, we lowered the Rg of this triple flip block core which will produce lightening quick revs in the midlane. We floored the Accelerator™ Reactive Coverstock for unmatched performance in medium to heavy oil. Be the first to cross the finish line when you go Full Throttle.

- Core: Cam Shaft™ Core
- Coverstock: Accelerator™
- Radius of Gyration: 2.484
- Differential: 0.050
- Finish: Fine
- Flare Potential: 5-6"
