Veneer	Bend It Pearl
Surface	500, 500, 4000, 4000 Abralon®
Core	Capsule core with Magnetite
Lane Type	Heavy – Medium Oil
Weights	12-16 Pounds

BEND-IT

Bend-It Reactive is a brand new formulation that was built to handle heavy to medium amounts of oil. Bend-It has a great amount of surface friction built into the shell and is finished with an aggressive finish in order to enhance the Omen's footprint on the lane. Don't let the pearl fool you, Bend-It was made to grab the lane.

CAPSULE CORE

The Capsule core was designed to provide great performance and versatility while also being very simple. A simple symmetric shape with great performance characteristics was chosen in order to be very driller and bowler friendly. The low RG Capsule revs up early and the high Differential helps create a large amount of flare for great continuation in the backend.

WHAT TO EXPECT

The new core, cover and finish process for the Omen makes it one of the best choices in the Columbia 300 lineup for heavier oil conditions. Players with lower rev rates and/or higher speeds will also enjoy the amount of hook the Omen creates.
