

PLUG IN.

The Power Surge™ is our latest reactive ball for oil. It's an early hooking ball with a strong midlane arc that continues to hook on the backend. The midlane arc makes this ball very controllable at the break point which allows the ball to hook even in carrydown. The shell is a solid, aggressive Super-Flex™ coverstock with Silver Traction Afflair MICA to help grab the lane through the oil. Power and control. That's the new Power Surge. Plug into it.

COLUMBIA 300

Columbia bowls the world over.
