

# SHAKE YOUR GAME TO THE CORE.

CERAMICORE™ / FLEXCEL™ G4

**QUAKE**  
CERAMICORE™

The Ultra Violet QUAKE will shake your game to the core. The UNDRILLABLE CERAMICORE™ is the densest pure ceramic component ever used in bowling manufacturing. This proprietary core construction, combined with new FLEXCEL™ G4 coverstock, yields a higher C. O. R. (Coefficient of Restitution). To the bowler, this high C. O. R. translates into a livelier pocket hit, creating more messengers and fewer single pin leaves.

FLARE BLOCK

Coverstock: 100% FLEXCEL™ G4 urethane by BASF.

Core: This peak differential Rg pear-shaped assembly houses an increased density, UNDRILLABLE CERAMICORE™. A performance enhancing flare block caps off the core.

Flare Potential:	Stroker	Cranker
Pin-in, over the label	1" - 2 3/4"	2 3/4" - 3 1/2"
Maximum leverage	3" - 4 3/4"	4 1/2" - 7 1/4"

Construction: Modified 2-piece.

Pin Placement: Ranges between 0" and 5" from center of gravity (CG) produced by core offsets of 0" to .200"

Hardness: 75 - 78

Available Colors: Ultra Violet / Neon Red Engraving

Available Weights: 14, 15 & 16
