15#	2.51	.053	.004
16#	2.52	.046	.004

BRING-IT PEARL

We've laid the Smack Down on the competition and now we're ready to take them down! Bring-It Pearl will give you great length and recovery without sacrificing overall hook. While we left some surface on the pearl cover to give you added hook and performance, you can polish your Take Down to give you even better length when encountering less volume.

SD MEDIUM RG CORE

The Smack Down core has a medium RG and a high differential. This core puts the tools in your hand to Take Down any condition that gets in your way. The medium RG helps the Take Down get further down the lane before the high differential kicks in for some awesome continuation!

WHAT TO EXPECT

Take Down most any lane condition and your competition with our newest addition to an already popular line! The Take Down will be an awesome all around ball for anyone!
