

**"GOOD NIGHT
PINHEAD!"**

**MESSENGER
TITANIUM**

**INTRODUCING
THE MESSENGER
TITANIUM™**

Say hello to a pin's worst nightmare. The Messenger Titanium. This pin splitting fiend offers you high-end performance at a low-end price. Its core technology generates a higher rate of rotation and more hook potential than any previous Messenger ball. And the Super-Flex™ reactive coverstock produces a strong arc at the break point and still conserves enough energy for a very powerful backend reaction. The Messenger Titanium. Think of it as the Sandman with an attitude.
