

How bad do you **want** it?

It's Complete NV. And no wonder. This ball performs even in high oil conditions. That's because its new Traxion Reactive coverstock and Spike Cover, Version 1B core work in tandem to bring better performance in the mid-lane and backend.

So get one. Have it drilled to your specs and watch it perform. Then check out the looks you get. Learn more at www.ebonite.com.
