

THE DRAGON IS HOT!

If you're ready for a ball so hot it leaves nothing but smoke, Champions Bowling Products is pleased to offer the

Green Dragon to breathe some fire into your game.

The Dragon comes out of

its skid with a smooth, stable roll and reaches its reaction point fully loaded with stored energy. It's at that exact point that the Dragon Fire weightblock ignites to deliver a heat-seeking move to the pocket. As it enters the pocket, the Dragon goes into full overdrive to deliver pin-crushing power.

Champions' technology has led to 7 titles and 14 other T.V. appearances in our first two years of existence. The Green Dragon's marriage of reactive coverstock and innovative Dragon Fire weightblock is a natural extension of that technology. So take the word of the Pros who are going to throw this ball for a living. "Ain't nothing going to slay this Dragon."
