

# DYNO-THANE / Concept 4

## Where advanced technology and quality craftsmanship come together

Dyno-Thane Enterprises, Inc. was formed to design and manufacture cutting-edge bowling products. We are now pleased to introduce what we believe is a revolutionary bowling ball - the Concept 4. Concept 4 is a 4 piece ball with a multi-density "Fly-Wheel Core" a shell heavy ball, with 66% of the total weight of the ball contained in the outer 1 1/8". Combining the "Fly Wheel Core" and

highly reactive cover, produces a high moment of inertia, resulting in a smooth extended length of trajectory for better accuracy, plus delayed hooking point for stronger pin hitting power. The unique core/shell weighting provides both maximum revolutions and maximum kinetic energy at impact with the pins.

**Concept 4 is a must for the serious player!**
