## The New D/T Pro XXtra is ready to roll.

We developed a new **SHD** cover stock that is incredibly versatile on heavy oil, wet / dry or blended conditions. We have reversed our blow mold hi density stack core and added a bisonium flip puck to produce a lower RG, lower track flare ball.

**Results . . .** We have an explosive rolling bowling ball that has plenty of flip-hook energy and power.

**How's that for a headline!**
