

Yeah, that's right...
we dropped a dime on 'em!

It is well known that the hardest pin to carry through in order to get a strike is, of course, the ten pin. Dyno-thane® has provided the solution to this problem by creating the new **Vendetta™ Particle**. Utilizing its unique DTP™ Particle coverstock, the **Vendetta™ Particle** provides a stronger mid-lane reaction by increasing the motion towards the pocket sooner and hooking stronger on heavier oil. So, if you are looking for a ball that will drop the dime every time, then the **Vendetta™ Particle** is your weapon of choice!
