

Firebolt™

The cutting edge of technology

Firebolt S.O.* FOR LIGHT OIL
— ball rolls long, hits hard without over-reacting to short oil conditions.
WINNER OF: 1987 FIO World Championship in Helsinki, Finland;
1987 ABC All Events; 1987 ABC Singles.

Firebolt FOR MEDIUM TO HEAVY OIL
— perfect for average oil lane conditions. **WINNER OF:** 1987 Women's US Open;
1987 Miller Lite Classic; 1987 Hammer Open.

Firebolt II FOR HEAVY OIL
— maximum hooking, hits hard, won't roll out. **WINNER OF:** 1987 Bowlers Journal
Open; 1987 Fair Lanes Open; 1987 Ebonite Seniors Championship; 1987 Kessler
Seniors/Touring Pro Doubles.

Dynamically-balanced top
weight verified by Exactatron II.

Earl Anthony

All-Time PBA Money Winner
All-Time PBA Title Holder

With the assistance of NASA, Ebonite has developed Exactatron II™, an advanced manufacturing method to assure dynamically-balanced high density weight blocks in every core. This ideal balance and control is enhanced by the unique urethane formulations of the Firebolt line.

From short oil to long, Firebolt balls put you in complete control of the lanes. Charged with extra urethane for exceptional performance, each Firebolt keeps pins lower for consistent carry-through. And Firebolt balls are consistent winners on the Pro Tour.

When oil conditions change, select the Firebolt finish that keeps you in control.
