

"Every pro faces it. The tenth frame, you're down 27 pins. It's do or die. No tomorrow. Your instinct says 'Go for broke!' But you know better. Fundamentals got you here, and fundamentals will pull you through. You take a deep breath, throw down the rosin and stride to the rack. The crowd hushes. They're with you. Another deep breath. And you reach for Ebonite.®"

Earl Anthony

All Time PBA Money Winner
and PBA Title Holder

Performance balls you can count on. The Ebonite Performance Line.

FIREBOLT™

The exceptional ball **charged** with extra urethane, Ebonite Firebolt keeps the pins lower for consistent carry-through. Real strike-making power for average lane conditions! The latest urethane performer from the world's leading maker of urethane balls.

MAGNUM® 10

A unique surface additive and new, dull porous design gives incredible gripping power on heavy oil lanes. Independent tests prove the new and improved Magnum 10 outperforms the leading heavy oil rubber competitor **point by game-breaking point!**

MAGNUM® 12

The Magnum 12 utilizes an easy-release polyester core and a dull, soft urethane surface for even rolling and extremely hard hitting on medium to heavy oil lanes.

GYRO™ I

Gyro 1 Red's all-rubber core minimizes ball deflection and keeps the pins lower for added carry-through. And its unique, high density weight block and dull, soft urethane shell assure strike-making consistency on heavy oil.

MAXIM IV® POLYESTER

Maxim IV polyester balls are especially designed to provide dependable, hard striking rolls to give you maximum performance. The medium hard cover provides good control for all average bowlers on a variety of lane conditions.
