

# The chemistry of the veneer makes the Green Monster so consistent it couldn't care less what shape the lanes are in.

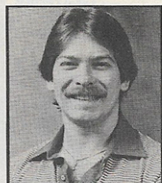

It's the new Ebonite Green Gyro I. It's also known as the "Green Monster." Whatever you call it, the new Gyro is a triumph of years of intensive development by Ebonite chemists and engineers and by Aerospace plastic consultants.

There's never before been a ball like it. Its secret is in the chemical composition of the shell.

A unique polymer in the veneer continually migrates throughout the shell. As it bleeds to the surface, it provides a unique effect that makes the ball react with amazing consistency.

Not only does this migratory polymer create a consistent reaction to the lanes. It also makes the shell so resilient and shock-absorbing that the pins in its path literally "collapse."

The new Green Gyro I is sold only through authorized pro shops. If you would like to make it available to your customers, call your Ebonite representative or write Ebonite Corp., P.O. Box 746, Hopkinsville, Kentucky 42240 or call toll-free 800-626-8350.

*"This is my ball!"*

Wayne Webb  
1980 Bowler of the Year.

During the 1981 Pro Bowlers Tour, Wayne Webb made seven TV finals and won two tournaments using the Green Monster.
