

The New Magnum 10 Anatomy of a Superstar

Earl Anthony

"These exclusive construction features of the new Magnum 10 enable it to perform like no other bowling ball on the market today. The Magnum 10 drives through the pins with minimum deflection, hitting them hard for maximum pin action, and the pins don't fly. Even on a light hit, pin carry is excellent. Also unique to the Magnum 10 is the fast, clean thumb release.

Traction is excellent on the oiliest lanes. The Magnum 10 rolls true every time."

Designed for the Bowler who is serious about his game, the Magnum 10 is available in 15 and 16 lb. weights. Top weight 2½ to 4½ ounces. For more information on this superstar of bowling balls, see your Ebonite representative or write Ebonite Corp., P.O. Box 746, Hopkinsville, Kentucky 42240 or call toll free — 800-626-8350.
