THE VORTEX™ SERIES BY EBONITE

You've seen the pros using them. And winning. There's a reason. The Vortex is the whammer-jammer. Modified Nitro R2 cores. The same coverstock as our phenomenal Matrix Trimax and TPS. But here's the zinger: they're value-priced. Hey, you simply can't get a better high-performance ball than the Vortex for the price. Check them out at your pro shop today. Then bombard the pins every time.
