

**It looks kinda like a sucker.  
So do the guys who don't buy them.**

*A whole new Zebra will be thundering down the lanes this fall. It's the Zebra IV™, the latest species to emerge in the incredibly popular Ebonite Fun Ball™ series. We turned the fun-o-meter up a notch this time, with bolder, glow-in-the-dark colors. More distinctive stripes. So when you're ready for the wildest game of all, bag the original Zebra from Ebonite. Anything else is just a painted mule.*
