

More Bang For Your

You don't have to spend four hundred bucks to fill your two-ball bag with reactive urethane power.

The solid value offered by the Tropical Storm has been unmatched until now . . . Say *hello* to the new ELECTRICAL STORM.

The ELECTRICAL STORM is the perfect complement to the strong backend hook of the Tropical Storm. This new addition to the Storm arsenal features a smaller weight mass and a thicker reactive urethane cover stock, resulting in an excellent **midlane hook** and **backend kick** that challenges any ball you're now using.

Treat yourself to the
best value in bowling! –
