

#1

Creates highest rate of revolution. Rolls up heavy in front part of lane. Smooth transition from skid to hook.

*"No ball this year showed more total HOOK or more back end, yet there was never any difficulty getting and keeping the ball on the lane".**

3-D OFFSET BLAZING VIOLET '97 Ball of the Year*

Solid and Power Solid Category

— Bowling This Month Magazine

Will history repeat? Will the 1998 choice for Ball of the Year be another 3-D Offset Hammer®? Check out the performance of the 3-D Offset Vibrant Blue and 3-D Offset Striking Red.

VIBRANT BLUE

No other ball turns the corner harder

Later break point. Turns the corner harder. Gets through the heads better on light to medium oil.

STRIKING RED

New aggressive cover stock, striking new ball

Grips the lane in heavy oil. Heavy revs at mid lane with strong reaction at the break point.

It's easy as 1, 2, 3-D!

Nothing hits like a HAMMER
