

2001

The Return of a Legend!

Introducing the Blue Hammer 2001. The combination of the NEW Nylothane II coverstock and the new Triple Protrusion Core gives the Blue Hammer 2001 the sharpest pocket entry angle in the Hammer line. By adding a third protrusion to the core, Hammer has created a whole new dimension to the best line of bowling balls in the world. The Nylothane II coverstock provides just the right amount of traction while the TPC core creates more core torque for a stronger backend finish. New cover, new core, new pocket entry angle all combine to create more strikes.

Check out the Blue Hammer 2001 and the other great Hammer products at www.faball.com

"The backend motion of the Blue Hammer 2001 breathes new life into my patented down and in shot."

—Walter Ray Williams, Jr.

"More motion on the back of the lane adds another weapon for me to conquer tough lane conditions."

—Marianne DiRupo
