

THE ICE BLUE IS RED HOT

Heat up your game with the coolest new addition to Faball Enterprises' RAZOR line of high performance lower cost bowling balls - the "ICE BLUE" Pearl Reactive RAZOR™.

The "ICE BLUE" features the high RG Dual Density Compound core first introduced in the Berry Reactive and Red RAZOR™ in a new Pearlized "HAMMERTHANE™" coverstock formulation.

The performance characteristic of the "ICE BLUE" is greater length and back end return for use on wet/dry or medium oily lane conditions. The "ICE BLUE" skates cleanly through the heads and makes a strong move on the back end making this a terrific transition ball that lends itself to being very bowler friendly on many lane conditions. With wins on the PBA, LPBT and the Megabuck tournament scene, the RAZOR™ line is performance proven.

To put the chill on your opponents, cream them with the Cutting Edge technology of the "ICE BLUE" Pearl Reactive RAZOR™.
